To Whom It May Concern:

As a Project Manager with Phillips Partnership, an architecture firm in Atlanta, Georgia, I have had the opportunity to work with Summit Contractors Group, Inc. on a 235 unit garden style multi-family complex in Newnan, Georgia. In my interactions with Summit, I have found them to be professional, knowledgeable, and well organized.

Summit facilitates a team approach, ensuring owner and architect involvement in important decisions while still maintaining key project schedule milestones. Every project has challenges, and throughout the construction process, Summit has been quick to provide effective recommendations for resolution that put the quality and budget of the project first.

From the perspective of a design professional, Summit is the type of General Contractor with which we prefer to work due to their clear communication and attention to detail. I would highly recommend them to our multi-family clients in need of general contracting services.

Sincerely,

David C. Wysocki
